

CLASS 006 - ARE WE ALONE IN THE UNIVERSE? ARE GOVERNMENTS HIDING THE TRUTH?

Published 16 May 2025 by Space Academy - Sector Earth

Gosia: Hi, welcome aboard! Thanks for coming. Today's video class will be here in the control deck room above Earth, since we will be discussing a burning question: Are we alone in the universe? As you might have already guessed, and since this is, after all, Space Academy, what I will share on this subject will not be something conventionally believed down there, on Earth, but you will also understand why that is later on.

Originally, I was going to make just one video for now but I realized there are too many important points I must mention so I divided it in two parts and the next one will come shortly after this one.

Before we jump in, I want you to understand one thing, something mentioned before in video two, and that is that a person cannot typically understand a concept which goes way beyond the framework of their mind and current understanding. They lack a necessary context. If I just come and say, for example, that the lion looking ET dressed in armor likes symphonic music, you will obviously think I am crazy or joking, as that's something that doesn't fit in your understanding of the world. You will experience what we call "cognitive dissonance", which is a rejection of the idea, or an interpretation of it based on what you currently have in your mental belief frame which is, in this case, there are no ETs and lions don't wear armor. In order for that concept to have a slight chance of being at least considered, your mind needs a minimal frame of reference, minimum openness and understanding. Only then, more advanced ideas can be given.

And that's what I am trying to do in Space Academy. Give you necessary context little by little, a base framework so that your mind can then be ready for more. This process of learning must, unfortunately, apply in the case of re-educating people on Earth in general, as they have been under heavy manipulations for centuries, and they don't have a frame of reference to understand certain space facts because they have been programmed to reject them. That is the case of the topic of life outside Earth. Any mention of extraterrestrial people is met with disbelief and above-mentioned cognitive dissonance, although it's not exactly people's fault, since that's the official conditioning they have been subjected to since birth.

Having said all this, let's begin, but do keep checking yourself for the cognitive dissonance as we go. It might creep in! When it does, just observe the rest of the video, no need to believe all what I share here, but keep the mind open to connect the dots as we go.

From the officially accepted narrative's perspective, "the only proven extraterrestrial objects are planets, stars, nebula, comets, asteroid, rock, forms of energy and little more". (Mari Swa) More complex extraterrestrial life is only viewed as a possibility, but unproven. Organizations such as SETI or NASA, supposedly searching for intelligent life out there, give us the illusion of open mindless, but since they haven't "discovered" anything yet, "trying so hard", there can't be anything out there then, or

at least it hasn't been found.

Let's cut right to the chase. Remember Class 2 where we talked about false realities and then about Matrix perception agreements imposed by the controllers? Remember I told you I would reveal them slowly? Well, at this very moment you are staring at the biggest one of them all, and that is Earth managers keeping the lid on the extraterrestrial life outside the planet. Hiding it, manipulating people's perception about it, and blatantly lying about the subject.

"People's general assumption that the human population at large is given all the truth and all that there is to be known is one of the biggest problems facing mankind nowadays". (Mari Swa)

Are you one of those with that assumption? I hope not, as that is one of the most powerful ways to control the human population. And control they do exert, especially in the field of life outside Earth. They simply do not, I repeat, do not want us to know this, and the reasons why will be discussed in future videos, as they are complex.

What they do want you to think is that the human being is indigenous to Earth, a marvelous blue ball rolling through space, where life evolved organically as a result of some kind of amazing Darwinian evolution, or, on the other hand, as an act of the divine hand - creationism. They have placed these two main schools of belief to satisfy both spectrums of humans, but notice they both point to Earth as the only place life has ever existed. For the more awakening individuals they have prepared Sumerian Tablets, for example, where human beings are described as the product of genetic engineering executed, yet again, on planet Earth.

Why so much insistence on Earth and humans belonging to it? Whose interest does it serve to have us all think that the humans are indigenous to only one planet in the whole universe? Why keep us isolated in a limited Earth Matrix if the truth is we are not alone?

The reality is, Earth humans have been kept in the artificially created illusion of isolation from life in space for thousands of years and, out of all the subjects Earth managers control, this is the one they keep the lid on the most.

"The idea that it is not known whether or not there is life outside of Earth is merely a concept controlled by the ones in power and it belongs only to people on Earth but only the people because governments and the members of the 'elites' know the truth very well". (Aneeka of Temmer)

The subject all governments on Earth have been trying to hide for hundreds, if not thousands of years, is the presence of extraterrestrials. They do that by simple denial, but especially "doing their best to erase the possibility of ET existence from the minds of the general population, skillfully inserting associations into the human mind which connect everything ET with entertainment, science fiction, and even cartoons". (Mari Swa).

Not to mention with craziness and conspiracy theories, shaping the general perception of what is real and what is not, molding the collective beliefs into what we call terrestrial Matrix. You had to notice it yourself, no? Try to mention extraterrestrials to the random person out there and see the reaction! You will be lucky if you get a serious one. Perhaps you are even cringing yourself!

Remember what we discussed in the previous videos, and that is that the collective reality on Earth is created by the set of perception agreements, Matrix agreements, and "whether or not the set of agreements that make up the terrestrial Matrix expands or not depends on groups called the Earth controllers, who do not allow the expansion of consciousness necessary to understand concepts that are outside of what they want". (Mari Swa)

Because this whole subject is huge, I must cut through to the most important points for this video. What I am really saying? Are we or are we not alone in the universe, yes or no? ---- > We are not. How do I know? Years of research and inner knowing but I also know because of something else, and I will tell you what that is in the second part.

"It's not that life is something that occurs in other parts outside Earth. Life is not the exception, it is the norm in the universe". (Swaruu of Erra)

Oh my gosh, crazy, no? No, to think that it is only means you have been programmed to believe so. It's more than ok. Just keep watching, and see how you feel a bit later, while I here keep sharing what I know.

The universe is full of life. And not only as rocks, planets, stars but it is full of intelligent life in all shapes and forms. The officials say it is not? Put that aside for now. Do you really want them to keep having you locked onto Earth as the only life-holding place in the entire universe? How could they ever manipulate us into believing such an illogical and limiting nonsense? Space is not only filled with stars and planets, but also with thousands and thousands of intelligent species, all with different degrees of advancement, looks and customs, ... races of all kind, humanoid and not humanoid, many of them directly and indirectly involved with Earth since millennia, coming and going across the passage of time.

Just look at all the traces of extraterrestrial presence, always finding another justification, of course, by the officials, such as great ancient megalithic structures, artifacts, and texts. Ancient mythologies all over the world all pointing to so-called "gods", mingling with humans endowing them with knowledge of all kind. What happened there, by the way, was the ancients turning the stellar people into gods as the perfect example of cognitive dissonance kicking in. In other words, the ancients didn't have the right context, so they came up with scenarios around ET people that, with limited understanding, tried to explain the facts that otherwise were inexplicable to them. We don't want that to happen again, by the way!

What about practices such as attempts to elongate skulls of the babies in some Earth cultures to resemble more their "gods"? Have you stopped to think that it could be because some of those "gods" are actually a race of people who visited Earth who happen to have their skulls and necks longer than us? Some of those skulls have been found on Earth in many places.

From more modern times, thousands of real cases of UFO crafts sightings and eye-witness stories, many of which of mundane origin but others indicating something else, something "unexplained". Not to mention all kinds of whistleblowers revealing

more and more openly that governments do indeed hide the extraterrestrial presence from the public.

I am not going to go into all this to show you how many clues we have on Earth to indicate we are not alone and never have been. This is something you can do on your own and it's not hard to find data, investigate if you want to learn more. There is so much information out there on this topic. What I want to focus on here is something much more important; something that isn't even mentioned much by the enthusiasts of life outside Earth, and it is the most relevant point to discuss. And that is that, among infinite forms of extraterrestrials out there, one of the most common one is actually... the humanoid one. The ETs that look exactly like you and me. People.

And this is where I must stop and we will continue in the next part. I know, I am stopping at the most interesting point, but I am not doing this as a "strategy to have you come back" but because, when designing this class, I realized that the topic of extraterrestrial people is very long with many important points, and it must stand on its own. So be a little patient, it will come very soon! It will also give you some space to breathe and see how you feel about this whole topic of life in space. Maybe do some researching?

For now, let's see what our community friends have to say about how they felt when they first found out we were not alone. Maybe it's similar to what you feel? Since this video has two parts, I also divided their videos, so we will see more of them in the next part.

(Bridge Emergency Call)

I am sorry, I've been called so I must pause for the moment, but don't go anywhere, this shouldn't take long.

Ok, I am back and so sorry for keep you waiting. It's how it is around here. Always something happening. What happened actually was a small docking problem. We have another ship coming in, docking in, at this very moment, and it's a very delicate maneuver for two heavy and large starships to come together. You need to bring them in very slowly and carefully because if not, they might crash as their large mass tends to attract them together, just like two magnets. But, anyway, it seemed the problem has been solved.

Of course, I am kidding! I am not really on the ship, as you know, but these are the real types of situations that do happen on spaceships all the time. I will be sharing more of them in the future. But ok, community videos, yes, let's go!

COMMUNITY WORKSHOP

Ok, so let's stop here for now and we will continue in the next part where I will talk about an essential part of the subject, extraterrestrial people. I know you probably have million questions about the subject, providing you are open to it. What do they want, why are they here, are they friendly, can they help us, why don't they land, how does it affect me to know this, etc., etc. Don't worry, I have been where you are, so I understand all your questions and will do my best to respond them all in many future video-classes. Just be patient, this is an enormous subject. And be open. You don't

even to accept at face value all I am sharing. As I said before, analyze and question things yourself to connect the dots. I am here just to help you see those dots, connect some of them too, but mainly see them, in case you, as a soul, forgot. Can't wait to see you here again. Remember, we meet at this exact place again. See you soon!

"Do not ask if there is life among all those stars filling the night sky, because those stars exist because there is life in them". (Swaruu of Erra)
