

GORI'EL REPORT. WHY THE EARTH MUST BE KEPT AS IT IS ACCORDING TO THE GALACTIC FEDERATION (ENGLISH)

Published 4 July 2024 by Swaruu Official - English

Mari Swa: Hello again. Thank you for being here with me once more. I hope you are very well today. I am Mari. This information can be seen as science fiction or as the viewer sees best and I post it for entertainment purposes only. Still, I take my information very seriously and for whoever has eyes to see.

Context: The local Galactic Federation, the one tasked to oversee Earth and all its affairs, recently decided to offer a series of conferences to explain to its member star races why it cannot intervene more directly in all the things happening on the planet. The conference series will occur twice a month in the Andromedan biosphere ship Viera, currently in Earth's high orbit, with the first one of them having taken place last Saturday, 29th of June 2024. This first conference was only to be an introduction to the subjects that will be addressed in the next ones to come.

It looks like the local Galactic Federation saw the need to do some explaining after noticing that several of its star races who are currently in Earth orbit are starting to ask too many questions about why Earth is permitted to be as it is. It looks like star races are starting to notice that something is quite off with Earth and how it's been managed by the Federation.

As the Taygetan Queen Alenym is recovering in her medical pod, and it is not safe for me to attend those meetings, even more so because the local Federation has openly expressed their dislike toward attending their meetings using remote presence technology, Captain Gori'el of the starship Alcyone has volunteered to attend those meetings in person but not alone, as he will go with at least other four people of his crew who will act as his bodyguards.

Captain Gori'el is one of the most senior and experienced starship captains of the entire Taygetan fleet. He has won several awards for excellence in starship management and efficiency in guiding his crew, and he has been the only captain to command the starship Alcyone as he has been with her since her first commission.

The starship Alcyone is considered the most powerful dreadnought and starship of the entire Taygetan fleet and is the lead vessel of the class that bears its name. It is the largest and most powerful starship to ever be part of the Taygetan star fleet and will be so until the newer starship dreadnought SS Aldebaran is finished. She is currently under construction.

Captain Gori'el has been here in low Earth orbit before, and not too long ago, his ship was part of the First Contact Project. So he has a lot of experience dealing with Earth matters. Captain Gori'el is fluent in three Earth languages: English, Spanish, and French. So he can interact with the main bulk of the people who follow my YouTube channel.

Gori'el is a big man, standing 6'5" tall. He looks like a 35-year-old man, and he has white skin, dark hair, an abundant black beard, and piercing blue eyes. He has taken the SS Alcyone through many exploration missions, including several ones to the rim of Orion, where he once encountered and managed his ship through a regressive

reptile blockade that ended up attacking his ship while he was exploring the rate of expansion of those regressive forces.

On another mission, he rescued the Taygetan exploration and research vessel starship Ata-Gerani, which was captured by Draco forces while inside the SH2-264 Angelfish Nebula on the top of Orion. The Draco forces there simply were no match for Captain Gori'el's skills and the sheer might of the SS Alcyone.

Since he has been in command of the starship Alcyone, he has always been a part of all the most dangerous and demanding Taygetan missions, projects, and endeavours, making him notorious and earning the respect of his crew and of the rest of the fleet to the point that, nowadays, the mere presence of the SS Alcyone is a powerful deterrent to any enemy forces. Whenever Taygetan forces are in trouble, he will be there with the Alcyone, whose mere presence is also seen as a strong political statement and a demonstration of Taygetan power. And that's why it is here with us now, and even more so when he is backed up by another Alcyone class dreadnought working next to him right here in low Earth orbit: the mighty SS Asterope.

Captain Gori'el is also familiar with dealing with the Galactic Federation and its double standards. He is also experienced and seasoned in complex exopolitics and diplomatic relationships between star races. And he is also a close friend of the 9-ft tall Urmah lion, Captain Roko of the starship Avyon One, with whom he has worked several times before, including during several deep space exploration and rescue missions. My point is that Captain Gori'el is quite experienced and qualified enough to deal with the Galactic Federation in presence, face to face, while representing us and the Taygetan people there.

He and his four crew members attended the first conference about why Earth must be kept as it is last Saturday, the 29th of June, 2024, and this is what he informed me.

Gori'el and his four friends arrived at the Andromedan biosphere ship Viera using a standard Taygetan shuttlecraft and were guided to a small hall, or conference room, quite close to the main arrival ports and hangars at the outer rim of the Viera. The room was small by Andromedan standards, as it could only seat something like 200 people. Yet, during the entire conference, only 34 people arrived, so the initial attendance to the first of the conferences was quite low.

Then he was told that the Centauri, Alfratans, who are the ones organizing the conferences directly, were separating the star races who attend the conferences by genetic or star family similitudes. Therefore, the 34 people who attended the conference room Gori'el and his friends were, only represented the races of Lyrian, or star human, origin, and not all the attendees of all other races who were distributed in other conference rooms.

I see this separation with much suspicion because that way we cannot assess or know how many races attended this series of conferences, nor can we know who or how many they are. I see this as a separation strategy to limit interaction and to prevent the races from organizing and from calculating how many of them may be against the Galactic Federation policies regarding Earth.

Of the 34 attendees to the Lyrian space human conference room, most of them were Centauri Alfratan. Then there was a small Antarian detachment and, of course, our five Taygetan representatives. No other Lyrian space human star races attended this

conference. The speaker and his two assistants were Centauri Alfratans, so no sleezy Etothans nor Andromedans were present there at the time.

After a short presentation about Galactic Federation transparency and its importance as the backbone of the most progressive and positive organization ever to exist, according to them, of course, while they talked much like any demagogic human politician would do, they started to enumerate the main points why the Galactic Federation thinks Earth must be kept as it is, also stating that they will expand in detail on every one of these topics as the next conferences develop as this one was only the introduction.

And those topics come as no secret to all of us and all of you who have been following my group for some time. And what I will enumerate next is not my opinion nor is it of my group, although we may agree with many of the points stated by the Galactic Federation, at least partially, although we may also completely disagree with some other ones as well, and we will discuss them as we go along during this series of conferences.

The first point and the backbone of all Galactic Federation arguments on this subject is the infamous: "souls enter Earth of their own free will and for the expansion of their own consciousness and awareness as part of their spiritual progression and personal ascension. And all the hardship lived on Earth is only a tool to create an expansion of the soul through the action of resistance".

So, if Earth and its living conditions as an existential realm are improved, there would be no other place, no other playground where souls could go to experience that level of hardship and spiritual challenge. The Galactic Federation does not see any better way to cause the expansion of a soul's awareness and spiritual progression other than through encountering resistance of all kinds, which would force them to evolve out of spiritual stagnation.

Against this argument, I would say that although it is partially true, it can only be applied to souls with a lower level of awareness, which need the motivation to make an evolution effort. Yet, suffering in itself can also cause stagnation, as the subject can only be focused on the suffering it is experiencing, therefore manifesting more of it into his or her life, causing a vicious circle that will generate only one thing: more suffering.

I can also argue that when a soul is evolved enough, it can find the motivation to progress in its spiritual path for the simple reason and for the sake of the expansion of awareness itself, where no suffering is needed. Very much on the contrary, those advanced subjects need their peace and quiet to be able to evolve and be in a creative high-frequency existential mental state.

Of course, the Galactic Federation could counter-argue me, stating that Earth is a place for lower-evolved souls. Therefore, resistance, suffering, and so on would be necessary to force them out of their spiritual stagnation.

And the second argument presented by the Centauri Alfratans, in the representation of the Galactic Federation, is a derivative or a consequence of the first. Earth and its grave problems, all its problems and all the mentality they create, force the Federation to isolate the planet so all that destructive mentality, including all its creations and manifestations, like tulpas and egregors, must be kept isolated from the rest of the

galactic star community to prevent it from spreading and infecting other societies who have already reached a high spiritual, moral, and ethical existential level. Thus, leaving Earth and its values as a standalone realm with laws and regulations, both legal and physical, that are only valid there and do not apply elsewhere outside the planet.

The third and last argument they presented is also a derivative of the first two. They state that as the planet is needed as a suffering realm for the expansion of souls, and as it has generated its own self-contained laws and regulations, it must also be kept isolated from the rest of the galactic star community. Because if not kept that way, Earth and its realm as it is would collapse under the weight of its own lies. Especially those that shape and form it.

If more direct, non-guided communication and interaction existed between star races and humankind, the Earth and its Matrix would collapse and would be absorbed or assimilated into becoming any other progressive holistic planet. Therefore, souls would not find any other place to incarnate in for a short and spiritually nurturing experience based on strong duality.

Those are the three points presented at the first introductory conference at the Viera about why Earth should be kept as it is, as informed by the Centauri Alfratan Galactic Federation representatives. There will be more points, but they will be addressed in the next series of conferences, which will be held twice a month. Captain Gori'el and his team will continue to attend the conferences.

This will be all for today. As always, thank you for watching my video and for liking, sharing, and subscribing for more, and I hope to see you here next time.

With much love.

Your friend,

Mari Swa
