

## SPACE NEWS 12, GALACTIC FEDERATION HARASSING TAYGETA, UPDATE FOR JANUARY 23, 2024 (ENGLISH)

Published 25 January 2024 by Swaruu Official - English

Mari Swaruu: Hello everyone, thank you for being here with me again. I hope you are all happy and well today. I am Mari. This information can be seen as science fiction or as the viewer sees best, and I post it for entertainment purposes only. Still, I take my information very seriously for whoever has eyes to see.

Since the higher Galactic Federation Eorthan representatives arrived in Earth's orbit last December 31st, they organized teams of their helpers, mostly from the Alfratan, or Centari race, to go to each one of the largest starships belonging to each one of the stellar races in Earth's orbit, which, at this time, there are 900 or more ships that exceed 1 kilometer in length and therefore are considered as major starships. This is why the visit of the higher Galactic Federation Eorthan detachment is called an audit or a major revision.

They claim that it is to prevent and stop illegal practices against the people of Earth. Yet, as seen from another perspective, it is a highly invasive procedure for all the star races that orbit Earth because they must open their ships, which are their homes, to a detailed inspection and revision of everything they have inside and what equipment they possess and use. It's like if the authorities came in to search your house.

In the past few days, the Galactic Federation has declared that they managed to stop a human smuggling operation which was being conducted by regressive grays from Orion who were passing off as harmless Zeta Grays. This sounds very good and cheers for that. Yet, from here, we see no proof at all that any such thing happened other than the official Federation notice. And, for what really matters and what concerns us here, is tangible things, real verifiable events that do reflect upon an improvement of the quality of life of the population of Earth.

So, all that we see from here is more of that Galactic Federation of Light garbage and empty promises that always state that a big change in favor of humanity is right around the corner because they arrested who knows how many bad people and liberated this or that high amount of young humans who were in captivity. They are always making things up so the gullible people stop taking things into their own hands as it is all solved. All they must do is wait and be patient.

The great liberation of humanity is always scheduled for tomorrow and, as the saying goes, tomorrow is the thing that is always approaching and never arrives. Nothing they say is provable. There are no facts, no positive tangible results. They are only official sugarcoated statements and it all looks a lot more like a white hat strategy and excuses all to gain more time.

Moving on, well, as it was to be expected, this next finally happened. After the Federation search parties revised several hundreds of starships in Earth's orbit, they finally came to Toleka. Well, they haven't actually arrived here yet. What they did was send a notice that this ship and our second large vessel, Saska 1, were now scheduled for a revision. They did not mention our escort destroyer Vigilant Eagle, perhaps because she is not big enough because they are searching only the ships that exceed one kilometer in length as if bad things wouldn't happen on smaller

vessels. So their search strategy doesn't make any sense there either.

The Eorthan detachment stationed in the Andromedan biosphere ship Viera has sent us a message stating that they want to meet with Alenym, Nai'shara and me in person, so we should go to see them at the Viera immediately. This invitation order extends also to anyone with enough rank and influence in the Taygetan detachment present in Earth's orbit, but they mentioned Queen Alenym, her sister Nai'shara and I specifically.

They said in their message that we should understand that they are no longer the same people as they were before and that whatever wrongdoings other members of their Eorthan race may have done should not be transferred to them, the ones here. The disputes and disagreements they had with the Urmah happened a long time ago, and the Eorthan race has evolved a lot since then. So, I, Mari Swa, must go to meet them in person so I can see that they are good people, so I can go back and write an essay to publish here on my YouTube channel stating my change of mind about the Eorthans and how they are. They specifically mentioned them wanting me to write an essay in their favor.

After the message was received, Alenym and Nai'Shara sent a message back to them stating that we were not going to comply with their demands because of our own ethical reasons and that we would not allow a search party on board any of our vessels either.

After that message was sent, the local Galactic Federation Andromedan representative in the Viera talked to Alenym and Nai'Shara, intervening in favor of the Eorthans, turning things around against us, stating that we were non-cooperative and even cruel because the Eorthans were doing everything they could to get closer to us to prove that they are positive and loving and that we were reacting unfairly, shutting our doors on them.

This turn of events is even using sentimental manipulation against us, exploiting our empathy because we were hurting Eorthans' feelings. But, as far as I understand, they do not have any emotions, right? We see this more as an Andromedan emotional interpretation manipulative transfer against us. During this talk, Alenym and Nai'Shara remained calm and firm with their non-cooperative stance and decisions.

Right after this happened, Alenym ordered the shutdown of all muon communications from all Taygetan ships. This means that no one can communicate with us through any standard interstellar communication technology or device, isolating us here until further notice to prevent any further attempt to manipulate or to coerce us. The only communications still running here are the internet, obviously, which partially also uses muon technology, and Taygetan internal communication systems connecting Toлека to Saska 1 and to our escort destroyer, Vigilant Eagle. Alenym also still has a running direct line of communication with the Urmah king Ruhr in his ship, the Avyon 1, who also shut down all muon communication devices only in solidarity with us as they do not really need to do that because the Federation already knows how stubborn those space cats are and can be.

For those of you who do not know, muon communication technology is the system that is most used by all interstellar races in space and consists of using coded pulses of muon neutrinos to transmit information through long distances as they travel through the ether and therefore are faster than light. Another way of describing this

muon technology more directly and clearly is to see it as a communication system based on coded gravity pulses. Lepton muon neutrino generators are used as means to create the gravity pulses which are the ones that travel through space through the very high frequency ether. No one uses radio and microwaves out here; that's ancient or only when communicating with people of Earth.

This insistence of the Eorthan detachment for me to go meet them has caused many theories and conclusions here. It looks like this simple YouTube channel has made much more of an impact than what we thought at first because it looks like what is being said here has bothered them quite a bit. Perhaps it had something to do with those other few star races who are now starting to ask questions about the real nature of the Galactic Federation, of their Eorthan representatives, and their infamous search audit they are conducting now.

The Galactic Federation representatives also stated that we have no right to impose the way we think and our opinions on others, but it is we who are thinking differently and all the others are only following the same official narrative repeating and obeying the same garbage, and it is we who are only defending our right to think differently. It is them who are trying to normalize us. It is them who are trying to impose their narrative only because it is generalized. And, as the saying goes, and as Nai'Shara pointed out just yesterday, if everyone has the same opinion, then no one is thinking.

The Eorthans and the rest of the Federation, this time through the Andromedans as well, are manipulating perception against us, using sentimental manipulation in their favor, turning us into the bad ones of this story simply because we do not agree with the dubious and shady procedures of the Federation, local and at large. We have not said that we did not want to talk to them. We clearly ask them to please talk to us through human-built video conference technology because we do not want to be mind-controlled by them all.

We know that Eorthans, among other races, cannot help but be telepathically invasive when they impose the whole concept on you while they also use the spoken word. In this aspect, they cannot help it; they see it as part of the natural process of communicating with other people. The problem is that we do not want to have our minds messed up with, as we can see that is happening with other races such as the Andromedans, who, even though are very telepathically strong, appear to be very cooperative with them and the rest of the Galactic Federation, perhaps because they are being the hosts to the Eorthan detachment as they are staying with them in their biosphere ship, Viera.

Through the years, this group has been offering the Galactic Federation several perfectly detailed and well-planned strategies to manage Earth and its problems in a much more positive way. For example, by being mentored by a coalition of Lyrian space human empathic races. But we have always met either with rejection from the Federation or simply by indifference and by being ignored. We are never taken into account for any decisions being made. They never hear what we have to say, always belittling us or twisting and turning things around in their favor in a completely unethical way. With this, also ignoring the fact that we too are members of the Galactic Federation.

We are also limited by the Galactic Federation to be able to travel, overfly, or land in certain parts of the Earth, with this controlling us even more and limiting our range of action. They also limit, restrict and interrupt communication with our friends, starseeds

and family on the surface, also forcing us to inform our every movement and even stop all extractions until further notice because they must study each case in detail before authorizing it.

Advanced souls on Earth, mostly starseeds, have demonstrated time and time again that they are evolving and willing to evolve even more, and have become compatible with a much more harmonious and peaceful future full of good things for everyone, including technology that would work for them and for the advancement of a better quality of life for the entire human race. Therefore, it is their right and their will to be aided and helped in their spiritual evolution by the Galactic Federation controllers of Earth, and not hindered and sabotaged by them all the time and every two minutes as it happens today.

And the very same thing happens to us here, to my group, as the Galactic Federation that is now using emotional manipulation against us is also sabotaging and hindering all our work and our efforts all the time. They even use dirty tactics such as removing all the money the Galactic Federation had assigned to us, as they assign a budget to all the star races that must operate on Earth. Because, as all of you know very well, without money you cannot do anything down there on the surface.

This leaves us with no choice but to either retreat back to our planets of origin, mostly Temmer and Erra, or figure out a way to make money ourselves to be able to finance food for everyday consumption here, needed gear and movement budget whenever it is necessary to do something there. With this, the Taygetans became completely dependent on me, on what I write for my YouTube channel and on your donations, and I deeply thank you for them. All of you are keeping us here in near Earth orbit and on YouTube because it looks like I am the only one who can write in the way which is needed at this time here.

This problem is a lot bigger because the decision-making has been restricted to only the main races of the Galactic Federation, at least here, four of them who are not even members of the Lyrian human family. And the rest must only comply with what those decide and by the rules, regulations and values they may have, and who impose them onto the rest of us with no regard to our opinions and personal points of view as star races who are also Galactic Federation members.

The simple fact that the Galactic Federation-controlled governments implement so many countermeasures to hinder and stop the spiritual growth of a large group of awakened individuals on Earth is proof that they do see a strong spiritual evolution in the masses that make up humankind. Therefore, the collective consciousness is expanding. But they fail to see that denying souls their freedom to expand their consciousness and freely choose which path to follow without any intervention from the Cabal or the Galactic Federation or anyone else is going against Source itself. It even looks like the basic problem on Earth is that the Galactic Federation does not consider human beings to be real holographic fragments of Source but rather simple avatars artificially created to play a video game whose setting or game map takes place there on Earth.

We will continue to be here for as long as it takes, leaking as much stellar information to humankind as we can and helping in every way we can.

In the last piece of space news for today, the Taygetan supply and assistance ship, Saska 2, a large Saska-class multi-purpose vessel, is on arrival right now and on final

approach to dock side by side with her sister ship, the Saska 1, which is also docked with Toleka right now. So, it looks like we will be three large ships docked together and one smaller one, the Vigilant Eagle, escorting us nearby.

The Saska 2 will unload Taygetan supplies, raw materials and spare parts so Saska 1 can remain here longer to complete the repairs it is performing on Toleka. It will also take away back to Temmer what is left of the badly damaged fighter ship Hungry Gunabul, and it will also dock with the Vigilant Eagle to deliver supplies and spare parts as well. And then it will return to Temmer in Taygeta in a few days.

I must stress that although the Taygetan supply ships do bring some supplies, we are still completely dependent on Earth even for food, as not all of us can eat or consume what the Taygetans bring, me included.

This will be all for my present report. As always, I will keep you informed of any further developments. As always, thank you for watching my Toleka news video and for liking, sharing and subscribing. I appreciate this a lot, and I hope to see you here next time. Take care.

With much love.

Your friend,

Mari Swaruu
