

SWARUU OFFICIAL, (ENGLISH)

Published 12 December 2022 by Swaruu Official - English

Mari Swaruu: In this channel, I will be uploading the unpublished conversations, both mine and those that I have had face to face, with my group of people from the star Taygeta in the Pleiades who have been in contact with countless humans since 2016. Although their intermittent presence on Earth dates back thousands of years, influencing and sometimes guiding many ancient and modern cultures.

This information can be, or not, classified by you as science fiction or as you see it best. This depends only on you. I clarify this only to comply with YouTube requirements and regulations. However, for us, it is something that is not only true but also very evident and of the utmost importance to whomever has eyes to see.

Although many people who will see this video already know the story behind it, I will give a brief summary, more for the new ones who find this channel for the first time.

The Taygetans are an extraterrestrial race of human morphology classified as Lyrians, just like the human race. They have a Caucasian appearance, red or blonde hair, and blue or green eyes. They are tall and are classified within the group of Nordic extraterrestrial races.

The Swaruunians are a genetically different variant of the Taygetans. They have enough unique and specific characteristics to be considered as a separate species, crystalline DNA (24 chromosomes, for example). However, they are still a variant of Taygetans and are characterized by being all women, and their partners are Taygetan men.

In 2016, the Taygeta expeditioners began a program that they call, with human terms, "First Contact," in which hundreds of them would enter the human Internet network and openly seek friendship and person-to-person communication with individuals from Earth, as well as with some governments.

In this way, they contacted several people who offered to publish their messages on their YouTube channels. It is very important to clarify that the Taygetans and the Swaruunians never asked anyone to publish their material. It was the YouTubers who asked them, and at first, they very reluctantly accepted.

There have been many YouTubers who have published Taygetan and Swaruunian material, some doing a very good job to this day. Although I must mention that the majority did a lousy job since they distorted the message and the material to be published to comply with their own agendas and for imposing on the public their own opinions and interpretations that they made with incomplete data. Thereby creating a massive misinformation full of a priori judgments that resulted in apparently contradictory, incomplete, and misleading information.

Despite the fact that at least two YouTubers, Robert from Despejando Enigmas and Gosia from Cosmic Agency, have done an excellent job over the years, I see the need to create this new channel where the topics to be published, are conversations and comments from the Swaruunian and Taygetan teams, unpublished and direct, without any personal interpretation of human origin, without any comment other than

that of the expedition members themselves.

A huge greeting with much love,

Mari Swaruu
