

# TAYGETA - GENDER ROLES, FALLEN ANGELS, AND MORE - MINITOPICS (EXTRATERRESTRIAL INFORMATION)

Published 17 January 2024 by Cosmic Agency, Gosia

Mini-Mini Topics:

Menopause

Robert: Does menopause exist in Taygeta or is that because of old age as a disease that occurs on Earth?

Swaruu X (Athena): There is no such thing. What there is, is that many women, almost all of them, can control their menstrual cycles mentally. But menopause as such does not exist.

Control of the reproductive system

Robert: Question from the follower: "What can the Lyrian woman control of her reproductive system?"

Swaruu X (Athena): The highly conscious and spiritually advanced woman in touch with her body can control ovulation and thus menstruation.

There is no impediment for an Earthly woman to do the same. If she does not achieve it, it is more a problem of perception and sub and unconscious programming than a problem of being on Earth. Yes, it can be done, and it is known that many have done it.

INDIA AND VEGETERIANISM/VEGANISM

Gosia: You said that vegan agenda is to reduce the population. In India they are 40% vegetarian and the population is not decreasing.

Yazhi: The agendas add up to achieve a big one. One agenda is not enough. That's why they use veganism and link it with the gay agenda, with GMOs, with food additives, with medicines and pesticides and with chemtrails. So all the agendas together make a big impact. You can't look at just one in isolation. They add up. And that's why people can't see what's going on. Because everything is compartmentalized.

ACCORDION

Gosia: Does the accordion exist in the Pleiades?

Swaruu X (Athena): The instrument itself here? No, but if it does, it is extracted, I have never seen it outside of Earth. As opposed to the piano, organ and stringed and brass instruments that are found elsewhere. However, that is as far as I know, I do not know if it exists elsewhere, and I recognize that it is very likely that it does.

## SOULS ON EARTH

Gosia: I have a question from me about Mari's video where she said that only the most advanced and strongest souls enter here. She said it to empower people here, so that they understand that they are strong, but we also said the opposite before. That Earth is for young souls who still need to learn from contrast and duality. That advanced souls do not need that. How to integrate these two points of view?

Swaruu X (Athena): As we are not in the afterlife, we cannot have a complete and definitive view. However, it does not have to be one or the other since the presence of young souls there with all their problems is precisely what causes the chaos that is the challenge to overcome for the advanced souls. That is to say, it depends on the point of view of each soul.

For the young souls, it is a place to learn duality and to integrate into their person and identity, but for the more advanced souls, it is a place to perfect their higher capacities and to learn to master matter, emotions and energy, manifestation. It is both.

Gosia: Although the most advanced ones of all wouldn't even need the challenges anymore, I think, right? They would not be interested in games of perfecting themselves in worlds of contrasts. They would be out of it, wouldn't they?

Swaruu X (Athena): As with everyone, it depends on the individual. And many will see it only as entertainment, perhaps.

## Gender social structure in Taygeta

Robert: We have never talked about what families are like in Taygeta, have we?

Yazhi: It seems very basic to me. Because they are Lyrians, it's similar to how they are everywhere else, like on Earth.

It's just that in Taygeta everything is loaded to the feminine side in terms of politics and in terms of social structure, because men are more interested in action and creativity or art. But if we explain that in an obscure way, we can fall into being seen as supporting terrestrial militant feminism and its depopulation agenda, when we do not.

In Taygeta, there are clear gender roles. On Earth, they are pushing for gender equality, equal opportunities for all, when in reality they are using the abuses and social and gender injustices that have been going on for a long time... to turn everything now against men. The most serious gender abuses today are committed by women against men with the help of the justice system and politics.

In Taygeta, gender equality is not pushed because it simply does not make sense, because men and women are very different, not only in biology, but in mentality and how they think. We seek to enhance and take advantage of the characteristics of both genders so that they can develop as best as possible according to their interests.

There are different things in terms of social roles, comparing Taygeta and Earth. For

example, in Taygeta it is very common to see women on sites and in engineering activities, as has been said already for years by my predecessors.

But what they have not said, and this is important, is that it is engineering but more in the aspects of planning and design, when men in engineering are the ones who are not only in planning and design but in execution, i.e., they are the ones who physically build the object in question (this generalizing). Mostly because of their greater physical strength. On Earth, feminists insist that they can do everything a man does.

But the evidence proves otherwise, because it has already happened that a corpulent feminist woman said she could do the construction work of a man. First, she couldn't handle the pneumatic hammer and then she broke her back moving materials. Women are not cut out for that. It's not that one gender is better than the other, they are simply complementary, as has already been said.

So, on Earth that is part of the depopulation agenda, the confusing of gender roles and identities, so that they are no longer attracted to each other and produce fewer babies. There aren't many women tending high tension cables 30 meters above the ground, at night and raining. Men do. All to keep the lights on. Women simply don't have the resilience and physical strength that men do.

In advanced societies, the interests of each individual who does not fight against his or her gender identity are enhanced. The mentality or predisposition for an individual to be interested in one profession or another does have a lot to do with his or her gender, since the brains are different.

## Metaphysics and Science

Gosia: I remember that in the only conversation I had with Eridania she told me that for her there is no metaphysics. Only science. Because it is one and the same.

Swaruu X (Athena): That is true. But here, saying that metaphysics and science are the same, only refers to Taygetan science which includes metaphysics. On Earth, metaphysics has no scientific validity, or only philosophical.

Everything that is impossible to prove scientifically, or with the scientific method, would fall within the field of metaphysics on Earth. In Taygeta, on the other hand, the concept of metaphysics as such does not even exist, since it is taken for granted that there will be things that we cannot yet explain, but there is no doubt that they exist in the same way that they do on Earth.

The concept of a ghost on Earth is difficult or impossible to prove scientifically. But for Taygeta's science there is no doubt since sensors such as interferometers detect the presence of very low or high frequencies. In this case, by having a far superior technology, things like lower astral entities, ghostly beings and so on are scientifically proven.

## Fallen angels

Gosia: Fallen angels, this term, are all the "Anunnaki", no? The ones that came from heaven. Why are they called fallen? Because they came down with ships?

Swaruu X (Athena): Yes, they are related to the fallen angels.

Two ways to interpret that:

1. Because they came down in ships, therefore fallen from heaven.
2. Fallen angels because they were expelled from God's grace, for having made him angry.

Gosia: Are you a fallen angel?

Swaruu X (Athena): No, because I am up here right now. Only when I go down or have gone down ,hihi.

Gosia: Yes but case two, what does that practically mean? It's just a biblical story, isn't it?

Swaruu X (Athena): In case two, we are getting into theology. Yes, that is biblical. That comes from Titus and Vespasian's mental projection, making God angry, as they ordered the collection of stories that would later become the Bible. Although the concept of angering God, or the gods, is much older. They invented it based on earlier ideas. It was used as a means of mass control to provoke fear. And it can refer to the Anunnaki even, Anunnaki including a whole variety of star races, not just one.

Robert: All names ending with "el" are Taygetan?

Swaruu X (Athena): The ending "el" refers to gods or names of gods. This ending is used in many star cultures, but it is true that in the Pleiades is where it is most used. From there come the words Elevation, Elevated, Elevator, Elohim, and so on.

Gosia: But "gods" in the context of how it was understood before, since they are obviously extraterrestrials.

Swaruu X (Athena): Yes, because in the case of the gods of Olympus, for example, with their love affairs and their entanglements with each other denote not that the gods are very human but that the humans were watching or finding out about the lives of the stellar beings that visited them at that time. However, it is not known how much of that is true and how much is just exaggerations or "cream" thrown in by the humans.
